Menstrual Calendar

Name_______________________________Year______________

You have reached menopause when you have not had a period for 12 months. During the transition to menopause (called perimenopause), it is normal to skip periods, but very frequent or heavy bleeding episodes often require an evaluation by your healthcare provider. Any bleeding after menopause requires an evaluation by your healthcare provider.

Record your menstrual pattern on this calendar each day, using the following symbols:

<table>
<thead>
<tr>
<th>Very heavy flow</th>
<th>Normal flow</th>
<th>Light flow</th>
<th>Spotting</th>
<th>No bleeding or spotting</th>
</tr>
</thead>
</table>
